

## Attachment 3 - Health Benefit Results

### Fleet Information

| Vehicle/Engine Class Number | Model Year | Sector  |
|-----------------------------|------------|---------|
| 1                           | 2000       | Freight |

### Health Impacts Allocation

| County and State           | Percent Reduction |
|----------------------------|-------------------|
| Los Angeles, California    | 30%               |
| Riverside, California      | 25%               |
| San Bernardino, California | 45%               |

### Health Impacts Estimation Tool Results

| County and State           | Annual Diesel PM2.5 Reduction (short tons) | Annual Cost |
|----------------------------|--|-------------|
| Los Angeles, California    | 0.0956                                     | -           |
| Riverside, California      | 0.0797                                     | -           |
| San Bernardino, California | 0.1434                                     | -           |
| <b>Total</b>               | 0.3187                                     | \$870,000   |

| Vehicle/Engine/Equipment Code | Technology                        |
|-------------------------------|-----------------------------------|
| Line Haul Locomotive          | Engine Replacement - All-Electric |

| Annual Benefits |
|-----------------|
| \$260,000       |
| \$130,000       |
| \$190,000       |
| \$580,000       |
